*Affidavits must be on approved forms and notarized. Some county environmental health departments have chosen to submit to the Board a blanket affidavit for all installers registered in their county, if the applicant is registered in one or more of these counties they should submit notification of this with their application. Each county reference counts as one affidavit.

**To qualify for the exam an applicant must have fulfilled BOTH of the following: 1) submitted, and the Board received, a completed application (form, fees, and affidavits) and 2) taken the required educational hours.

Note: This certification does not exempt an installer from having to be certified by any proprietary system. Having received certification for a proprietary system DOES NOT exempt the installer from having to receive NCOWCICB certification.
